

LOCTITE Hybrid Adhesive

HY 4060

LOCTITE® HY 4060 GY is a grey, 2-part, general purpose cyanoacrylate/epoxy hybrid adhesive with high strength and fast fixture at room temperature. It has good temperature and moisture resistance and bonds a variety of substrates including metals, most plastics and rubbers.

It is ready-to-use and dispensed directly from the pack for manual mixing. The two coloured components allow for indication of correct mixing.

Your Benefits:

- General purpose
- Cyanoacrylate/epoxy hybrid
- Very fast fixture at room temperature
- Bonds a variety of substrates including metals, most plastics and rubbers
- Good temperature and moisture resistance
- Ready-to-use and can be dispensed directly from the pack for manual mixing
- Two colored components allow the indication of proper mixing.
