

WCCO Belting, Inc.

Combine Pickup Rear Belt

For JD 615P

WCCO's product development engineers work to find innovative solutions to customer requests and are always busy dreaming up new rubber products that shape market trends. They have internal textile engineering capabilities and their engineering team works closely with WCCO's fabric vendors on new fabric designs and holds them to strict quality control standards. There are also several mechanical and manufacturing engineers on the WCCO team, as well as a manufacturing and process improvement engineer that is dedicated to continuously evaluating their equipment and monitoring our lean manufacturing processes.

Part Number	Mfr. Number	Fits Model	Description
BEL1012624	H218052 HXE108260	JD 615P	44.48 x 67.717 2 Ply .25 Clt., Bolt Together, Rear Belt

* Not a new product - used in conjunction with BEL1012624

3 Ply Baler Belts

Fits Vermeer

WCCO baler belting uses 100% polyester fabric that's made with tightly packed yarns to increase belt strength. A stronger fabric makes for a stronger belt, which explains WCCO's dominance in the market.
